My Name

August 18, 2023

1 Introduction

This is the introduction.

2 Methods

2.1 Font Effect

The first part of the methods. *words in italics* *words slanted* WORDS IN SMALLCAPS **words in bold** words in teletype sans serif words roman words underlined words

2.2 Font color

22 speak now 1989

2.3 Font Size

normal size words tiny words scriptsize words footnotesize words small words large words Large words LARGE words huge words

2.4 Paragraph Indent

LaTeX defaults to the first line of the first paragraph of each chapter, and the first line of subsequent paragraphs is indented. If you want the top frame of the paragraph, just add the 'noindent' command before the paragraph you want the top frame.

If you want all paragraphs to be top-lined globally, use the 'setlengthparindent0pt' command at a certain position in the document, and all subsequent paragraphs will be top-lined.

2.5 List

2.5.1 Enumerate and Itemize

1. First thing
2. Second thing
 - A sub-thing
 - Another sub-thing
3. Third thing

2.5.2 Change Flags

Flags for unordered list headers can be modified using square bracket arguments.

- First thing
- + Second thing
 - Fish A sub-thing
 - Plants Another sub-thing
- Q Third thing
